

Legacy Docks LLC

The Legacy Docks team is leading the aluminum dock industry through innovation. Our docks ride on a 10" E-Channel frame, the largest in the business. Extruded from 6000 series marine grade aluminum, the newly created profiles for posts, frames, & decking provide a fresh look coupled with greater structural fortitude. Leading through innovation as opposed to reacting by imitation, Legacy Docks stands apart from the competition.

Our 10" E-Channel frame, combined with our new profiles, provide the most substantial platform in the industry. Combining the E-Channel with any of our decking options makes it the best aluminum dock available today.

Legacy Docks exclusive watertight decking, features the most up-to-date design which gives our flooring a unique look to match our frame components. This flooring combines good looks & structural integrity, with a barefoot friendly surface that won't trap dirt!
